PUTTING RHINO POACHERS WHERE THEY BELONG.

Dr Cindy Harper

SANParks Honorary Rangers invites you to “Putting Rhino Poachers Behind Bars,” a fascinating talk delivered by Dr Cindy Harper, BVSc and MSc (Vet Sci).

In her address, Dr Harper will explain how her department, the Veterinary Genetics Laboratory at Pretoria University, uses Rhino DNA to convict poachers and how her work at RhODIS® [Rhino DNA Indexing System](#) contributes to mapping global rhino horn trade routes.

If you love rhinos, this is one talk you can't afford to miss.
